TEHSEEN AHMED

Senior Software Engineer

Karachi, Sindh, Pakistan | +92 336 243 7918 | tehseen.siddiq@gmail.com | linkedin.com/in/tehseensiddiq | tehseenahmed.me

PROFESSIONAL SUMMARY

Senior Software Engineer with nearly 10 years of experience delivering production web, mobile, and platform software, including 8+ years building Node.js backends. Builds secure APIs, real-time systems, data-intensive workflows, and scalable product features from architecture through production operations.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Node.js, React, Next.js, React Native, Express, NestJS, Koa

APIs & Architecture: REST APIs, GraphQL, WebSockets, Socket.IO, Multi-Tenant Systems, JWT, OAuth, RBAC

Data & Cloud: PostgreSQL, MS SQL Server, MongoDB, Firebase, Redis, GCP, AWS Lightsail, Docker, PM2

Quality & Delivery: Automated Testing, Jest, Mocha, Chai, CI/CD, GitLab CI, GitHub Actions, Snyk

Product & Platforms: Mapbox, GeoJSON, KMZ, OpenAI APIs, LLM Integrations, Webhooks, Queues, Background Jobs

PROFESSIONAL EXPERIENCE

Software Engineer (Contract) | Edged

Remote | Aug 2024 - Jun 2026

- Shipped an authenticated geospatial workspace in React, Mapbox GL, and Node.js that enabled teams to plan sites across four interactive spatial workflows: land-boundary estimation, 3D infrastructure placement, wire routing, and solar-output analysis, replacing fragmented manual planning work.
- Implemented interactive spatial editing for points, lines, polygons, radii, GeoJSON, and KMZ-derived data, enabling teams to create and persist site-specific planning data.
- Developed site-analysis experiences for climate and ASHRAE data, renewables projections, equipment planning, and simulations while keeping map context connected to decision workflows.
- Integrated Snyk code scanning into CI/CD pipelines and partnered on REST and GraphQL API specifications to improve delivery and security practices.

Principal Engineer & Founder | Digitaleap

Karachi, Pakistan | Aug 2019 - Aug 2024

- Led end-to-end delivery of 50+ production web and mobile projects, owning architecture through release and achieving 87% on-time delivery across 6 concurrent clients.
- Built secure multi-tenant Node.js APIs with JWT, OAuth, Passport.js, refresh tokens, RBAC, validation, rate limiting, and role-based authorization.
- Implemented Stripe payment webhooks and background jobs for analytics, newsletters, and database backups; updated transactional records from verified payment events.
- Delivered real-time chat, social-comment, and dashboard features using Socket.IO, native WebSockets, and Firebase listeners.
- Improved API performance through database indexing, pagination, Redis caching, queues, and connection reuse; implemented booking-slot availability caching for Serve Me.
- Managed Node.js applications with PM2 on AWS Lightsail and Ubuntu VPS environments; containerized Node.js applications and databases with Docker.

Web & Mobile App Developer (Concurrent Contract) | QSkip

Remote | Dec 2017 - Feb 2018

- Delivered 50+ product features across web and mobile applications, including server-side integrations and user-facing workflows.
- Profiled API interactions and optimized client-side rendering paths to improve mobile performance and load responsiveness.

Full-Stack Developer | Stack Innovations

Karachi, Pakistan | Dec 2016 - Feb 2018

- Built Node.js and Express REST services for web and mobile applications and resolved production issues across the full stack.
- Triaged and fixed customer-impacting defects to reduce downtime and improve application reliability.

EDUCATION

Bachelor of Science in Computer Science | Dadabhoy Institute of Higher Education, Karachi, Pakistan | 2015 - 2019
